Berlin, Germany

SUMMARY

AI Product Manager and Product Owner with 8+ years of experience building digital and AI-enabled products. Specialized in explainable AI, ML-driven SaaS platforms, and data-informed product decision-making.

EXPERIENCE

- AI Project Manager (AI Product & Delivery Focus)

09/2025 - 02/2026

neuefische GmbH - School and Pool for Digital Talent

Berlin, Germany

 - Built and delivered an ML-powered B2B SaaS product ("AI Compass") from discovery to deployment.
 - Defined product vision, roadmap, prioritization, and measurable outcomes.
 - Translated business challenges into structured AI product requirements and user stories.
 - Designed a dual-engine system combining deterministic scoring with ML models (clustering, anomaly detection, peer benchmarking).
 - Coordinated frontend (React), backend (FastAPI), and ML workflows in Agile sprints.
 - Applied explainable and responsible AI principles to ensure transparency and stakeholder trust.
- Senior Product Owner / Digital Project Lead

07/2023 - 06/2025

Klarstein (formerly Berlin Brands Group)

Berlin, Germany

 - Supervised Agile delivery of large-scale e-commerce platforms and internal digital systems.
 - Directed UX/UI redesign of high-traffic websites and IoT mobile applications.
 - Managed strategic tool migrations: Search (FactFinder → Bloomreach), Personalization (Dynamic Yield → Bloomreach), Consent (OneTrust → UserCentrics).
 - Oversaw development of a custom in-house CMS for marketing campaign management.
 - Ensured GDPR-compliant implementations and executive-level stakeholder alignment.
- Product Owner / Digital Project Manager

11/2021 - 02/2023

Zennova Home

Abu Dhabi, United Arab Emirates

 - Guided ERP system development and enterprise-wide implementation.
 - Managed the launch of four e-commerce platforms.
 - Oversaw HRM web and mobile application development.
 - Drove digital transformation across operations and procurement.
- Product Owner / Digital Project Manager

02/2017 - 10/2021

BLOOMR

Ra's al Khaymah, United Arab Emirates

 - Led development and redesign of an e-commerce platform.
 - Managed IT infrastructure implementation across retail and warehouse.
 - Directed cloud migration of accounting systems.
- PHP Developer

02/2016 - 01/2017

Loops & Logic

Lahore, Pakistan

 - Developed PHP-based web applications in HRM and Healthcare domains
 - Built backend systems and database integrations
- IT Support

06/2012 - 01/2016

Revenue Department Divisional Office

Sargodha, Pakistan

 - Supported IT systems across government departments
 - Maintained system stability and reporting infrastructure

SKILLS

- AI & Data

Machine Learning Fundamentals, ML Pipelines, Explainable AI, Model Evaluation Concepts, Data Analysis, Responsible AI
- Product & Leadership

Product Strategy, Product Ownership, Roadmapping, Backlog Prioritization, Stakeholder Management, Agile Delivery (Scrum)
- Tech

Python, FastAPI, PHP, React, PostgreSQL, MySQL, SQL, REST APIs, Scikit-learn, Git

EDUCATION

- Master of Information Technology

University of Sargodha

03/2013 - 03/2016
- Bachelors

University of Sargodha

02/2011 - 02/2013

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO®)

Scrum Alliance
- Professional Scrum Product Owner (PSPO™ I)

Scrum.org
- Professional Scrum Master (PSM™ I)

Scrum.org
- AI Project Manager Bootcamp

neuefische GmbH (Spiced Academy)
- Google AI Essentials

Google & Coursera
- Business Analysis & Process Management

Coursera

AI PRODUCT PORTFOLIO

ProductLogik – AI Product Intelligence SaaS Platform

01/2026 - Present

Berlin, Germany

- AI-native SaaS platform transforming customer feedback into strategic product decision intelligence.
- Defined product vision, roadmap, and subscription-based monetization model.
 - Architected multimodel AI orchestration (Gemini + GPT fallback) ensuring reliability and cost efficiency.
 - Designed explainable insight engine with confidence scoring and agile antipattern detection.
 - Built and deployed full-stack architecture (FastAPI, PostgreSQL, React) with secure authentication and quota governance.
 - Tech:** Python, FastAPI, PostgreSQL, React, TypeScript, Stripe, Gemini API, OpenAI API

AI Compass – AI Maturity Assessment Platform

12/2025 - Present

Berlin, Germany

- SaaS platform evaluating AI readiness and maturity across key business dimensions.
- Defined 7-dimension AI maturity framework and structured evaluation model.
 - Developed hybrid scoring engine combining rule-based logic with ML clustering and benchmarking.
 - Generated explainable transformation roadmaps aligned with capability gaps.
 - Led end-to-end product discovery and cross-functional Agile delivery.
 - Tech:** Python, FastAPI, Scikit-learn, PostgreSQL, React, ML Pipeline
